Professional Summary

B.Tech Computer Science (AI & ML) student with strong interest in software development and full-stack engineering. Hands-on experience in Python, Java, React, and Flutter through startup-level and academic projects. Internship experience in software development and AI. Actively seeking opportunities to apply problem-solving and development skills in real-world projects.

Technical Skills

Programming Languages: Python, Java, JavaScript

Web Development: HTML, CSS, Tailwind CSS, React, Next.js, Node.js

Backend & Frameworks: Django, Flask

Mobile Development: Flutter

Databases: MySQL, SQLite

Tools & Platforms: Git, GitHub, Streamlit, Figma

Concepts: Data Structures, Machine Learning Basics

Projects

DineEzee – Smart Food Ordering Platform (Web Application)

Tech Stack: Next.js, React, Node.js, MySQL, Firebase

- Co-founded and co-developed a startup-level web platform for smart food ordering and restaurant management.
- Built responsive UI and integrated backend APIs using Next.js.
- Implemented features such as digital menu management, food availability control, and role-based access.
- Designed the application with scalability in mind; project is currently under development and demo-ready.

DineEzee – Mobile Application (Flutter)

Tech Stack: Flutter, Firebase

- Independently designed and developed the Flutter-based mobile application for the DineEzee platform.
- Implemented UI screens, navigation, and app logic aligned with the web platform.
- Built as a companion app to the DineEzee web system for mobile users.

Cats vs Dogs Image Classifier

- Developed an image classification model using Python and TensorFlow.
- Deployed the model using Streamlit for real-time prediction.

Personal Portfolio Website

- Created a responsive portfolio website to showcase projects, skills, and certifications.
- Used React and Tailwind CSS for clean UI and improved user experience.

Internship Experience

Software Development Engineer (SDE) Intern – Bluestock Fintech (Remote)

Duration: 2 Months

- Contributed to development and improvement of fintech-based web applications.
- Worked with frontend and backend technologies to build scalable features.
- Collaborated with team members in an agile environment and participated in code reviews.
- Gained hands-on experience in real-world software development workflows and debugging.

AI Intern – Novolo AI (Remote, USA)

Duration: 3 Weeks

- Worked on AI-related tasks involving data handling and model understanding.
- Gained exposure to real-world AI workflows and remote collaboration.

Education

B.Tech in Computer Science Engineering (AI & ML)

Jain University, Kochi

Expected Graduation: 2028

Workshops & Activities

- Participated in Smart India Hackathon (SIH) 2025.
- Attended multiple technical workshops on AI, software development, and prompt engineering.

- Involved in research paper submission focused on solutions for controlling Water Hyacinth.

Additional Information

Open to internships in Software Development, Web Development, Full-Stack Development, and AI/ML. Willing to learn new technologies and adapt quickly in fast-paced environments.
